SKILLS:

Expertise: Data Analysis.

Language: Python, R.

Tools/Tech: Microsoft PowerBi, Microsoft Excel, SQL database, APIs, Hypothesis Testing, A/B testing, Pandas, NumPy, Scikit-Learn, Matplotlib.

WORK EXPERIENCE:

Fluence Network - Remote

Mar, 2025 – May, 2026

Cloud Ambassador

- I worked on deploying workloads on the compute platform and documenting the processes for developers.
- I helped grew its ARR from \$800K to over \$2M by demonstrating how to deploy applications on Fluence Cloud to business owners.

EDUCATION:

Federal University of Technology, Minna

May, 2023 - till date

B. Eng. in Civil Engineering

CGPA: 4.25/5.00

Relevant Course works: Data Mining, Data Modeling, Information and Applied Mathematics, Machine Learning, Image Processing.

PROJECT WORK:

• Telco Customer Churn Analysis

I cleaned and analyzed a telecommunications customer churn dataset using SQL, uncovering patterns in customer behavior, service adoption, customer value, revenue generation, and churn.

I also produced a comprehensive analytical report and interactive Power BI dashboard with actionable insights to support customer retention strategies and data-driven business decisions.

Using SQL queries, a three-page Power BI dashboard, and comprehensive project documentation, I analyzed customer churn, realized \$2.86 million in revenue loss and \$13.19 million in retained revenue, and highlighted the importance of improving customer satisfaction to achieve sustainable customer retention.
